Figure 83. Test Details

### 22.1 Test Details

This section repeats the information provided in the table, with the addition of:

Description: Description of the test as entered by the teacher during the test creation process

Total test time: Provides a break down for each component of the test i.e., review time, attitude time, and test duration.

It is intended to provide a reminder of the key information about the test.

### 22.2 Curriculum Strands

The Curriculum Strands table shows the topics that will be covered in the test and how many questions in each topic. This is the same as provided on the teacher Test Details summary page.

Note: If the test is an Adaptive test, then the *percent* of questions (rather than how many questions) included in the full set of possible questions that could appear for an adaptive test overall, will be given. This is because the questions a student gets on the 2<sup>nd</sup> and 3<sup>rd</sup> stages will vary, depending on how the student does on previous stages. (See Educator Module - Adaptive Testing section for more details.)

### 22.3 Buttons

*Sit Test*

If the test is:

Delivery method = Onscreen  
Status = Ready

the sit test button will be enabled. If the delivery method is Paper then this button will never be available.

#### *Print Page*

The purpose of this button is to print out the confirmation message the student receives when they have finished the test.

#### *View Report*

If the test is in a scored status, then the **View Reports** button will be available.
